SELECTED PROJECTS

SmartBMS-IoT & Deep Learning Battery Health

Python | TensorFlow | FastAPI | Flutter

- Engineered an IoT predictive maintenance system predicting battery SOH, SOC, and RUL via LSTM, Random Forest, and XGBoost models.
- Applied transfer learning from NASA benchmarks to a 620M-row dataset, achieving <2.5% RMSE accuracy, and integrated SHAP explainable AI into a Flutter mobile dashboard.
- Engineered a dual-mode communication pipeline (ESP32 via WiFi HTTP POST with Bluetooth SPP fallback) with on-device TFLite inference and built a FastAPI REST backend with Supabase PostgreSQL.

Cortex AI Study Assistant

Python | LangChain | RAG | ChromaDB

- Built an end-to-end RAG system allowing students to upload PDFs and interact via Q&A, quiz generation, and summarization.
- Implemented semantic search using ChromaDB and Cohere embeddings for precise context retrieval.
- Deployed a FastAPI backend with a Streamlit frontend on Streamlit Cloud.

Personal Portfolio with AI Chatbot

HTML5 | CSS3 | JavaScript | FastAPI | Python | Cohere API

- A personal portfolio website with an integrated AI chatbot that answers questions about my skills, projects, and experience in real time using Cohere LLM and FastAPI.
