SKILLS

- HTML
- CSS
- Javascript
- Bootstrap
- Wordpress
- Shopify
- Python
- LangChain
- FastAPI
- RAG Systems
- ChromaDB
- Large Language Models
- Prompt Engineering
- Streamlit
- Vector Databases
- Artificial Intelligence
- PHP
- REST API Development
- On Page SEO
- Off Page SEO
- Digital Marketing
- Paid Ad Campaigns

FAIQ MOHSIN

AI ENGINEER & WEBSITE DEVELOPER

PROFILE

Full Stack Developer transitioning into AI Engineering with hands-on experience building production-ready AI applications and intelligent IoT systems. Proficient in Python, Machine Learning models (LSTM, XGBoost, Random Forest), RAG architectures, FastAPI, TensorFlow/PyTorch, and vector databases. Built and deployed high-impact AI systems combining predictive telemetry, transfer learning, dynamic Flutter dashboards, and edge deployment.

WORK EXPERIENCE

DYNAMIC MEDIA GROUP

Website Developer

JULY 2025 - PRESENT

- Design, maintain, update and develop responsive, visually appealing websites tailored to client needs.
- Build, customize, and manage eCommerce stores using Shopify.
- Develop and manage dynamic websites using WordPress CMS..

HSF TECHNOLOGY

Frontend Developer

NOVEMBER 2024 - JULY 2025

- Design, develop, maintain, and update responsive, visually engaging websites tailored to client requirements.
- Build, customize, and manage eCommerce stores using Shopify, ensuring a seamless and user-friendly experience.
- Develop, customize, and maintain dynamic websites using WordPress CMS.

Finex Outsourcing

SEO Expert

APRIL 2024 - OCTOBER 2024

- Collaborate with websites and blogs for guest posts to build backlinks and boost SEO.
- Implement traffic-driving strategies to increase visibility and generate leads.
- Perform keyword research to enhance content visibility and drive organic traffic.

The WebStorms

Frontend Developer

JUNE 2023 - JANUARY 2024

- Developing and designing websites and e commerce stores.
- Establishing User-friendly interface.
- Making websites responsive to be able to run on different devices.

EDUCATION

2023 - 2027

NUML UNIVERSITY

- Bachelor's in Computer Science

2022 - 2023

BRAIN'S GROUP OF COLLEGES

- Diploma of Website Designing and Development
- Diploma in Digital Marketing and Freelancing

LANGUAGES

- English (Fluent)
- Urdu (Fluent)

FEATURED PROJECTS

SmartBMS - IoT & Deep Learning Battery Health

FINAL YEAR PROJECT

- Engineered an IoT predictive maintenance system predicting battery SoH, SoC, and RUL via LSTM, Random Forest, and XGBoost models.
- Applied transfer learning from NASA benchmarks to a 620M-row dataset, achieving <2.5% RMSE accuracy
- Integrated SHAP explainable AI into a Flutter mobile dashboard for plain-language diagnostic notifications.
- Engineered a dual-mode communication pipeline (ESP32 via WiFi HTTP POST with Bluetooth SPP fallback) with on-device TFLite inference.
- Built a FastAPI REST backend with Supabase PostgreSQL and automated relay safety triggers.

Stack: Python, TensorFlow, PyTorch, XGBoost, SHAP, FastAPI, Flutter, Dart, TFLite, ESP32, Supabase

Cortex AI Study Assistant

AI ENGINEERING PROJECT

- Built an end-to-end RAG system allowing students to upload PDFs and interact via Q&A, quiz generation, and summarization.
- Implemented semantic search using ChromaDB and Cohere embeddings for precise context retrieval.
- Deployed a FastAPI backend with a Streamlit frontend on Streamlit Cloud.

Stack: Python, LangChain, LangGraph, RAG, ChromaDB, FastAPI, Cohere API, Streamli
