Portfolio: faiqmohsin.netlify.app

PROFESSIONAL SUMMARY

Computer Science student at NUML University and Full Stack Developer transitioning into AI Engineering with hands-on experience building production-ready AI applications. Proficient in Python, LangChain, RAG systems, FastAPI, and vector databases. Built and deployed Cortex — a live AI study assistant — and SmartBMS — an IoT battery health prediction system. Strong foundation in web development, eCommerce, and digital marketing combined with modern AI engineering skills. Open to remote AI engineering roles and freelance projects internationally.

EDUCATION

Bachelor of Computer Science 2023 — 2027
NUML University (National University of Modern Languages), Lahore

FSc Pre Medical 2021 — 2023
Punjab College

WORK EXPERIENCE

Full Stack Developer & Digital Marketing Expert July 2025 — Present
Dynamic Media Group

- Design, maintain, and develop responsive websites tailored to client needs
- Build and manage eCommerce stores using Shopify including product listings, payment integrations, and theme customization
- Develop and maintain dynamic websites using WordPress CMS with custom plugins and themes
- Plan and execute paid ad campaigns on Facebook, Instagram, and Google Ads to drive traffic and conversions

Website & eCommerce Developer November 2024 — July 2025
HSF Technology

- Designed and developed responsive, visually engaging websites tailored to client requirements
- Built and customized eCommerce stores on Shopify ensuring seamless user experience and mobile responsiveness
- Developed and maintained dynamic websites using WordPress CMS with custom theme modifications

- Created and managed RESTful API integrations to connect frontend interfaces with backend services

SEO Expert
April 2024 — October 2024

Finex Outsourcing

- Built high-quality backlinks through strategic guest posting on authority websites to boost domain ranking
- Performed in-depth keyword research to identify high-traffic opportunities and optimize content visibility
- Implemented on-page and off-page SEO strategies increasing organic traffic and lead generation
- Monitored rankings and traffic using Google Search Console and SEMrush reporting to clients monthly

Frontend Developer
June 2023 — January 2024

The WebStorms

- Developed and designed responsive websites and eCommerce stores from scratch
- Built pixel-perfect UIs using HTML5, CSS3, JavaScript, and Bootstrap ensuring cross-device compatibility
- Integrated third-party payment gateways and shipping plugins into eCommerce platforms
- Ensured user-friendly interfaces with focus on performance, accessibility, and mobile responsiveness

FEATURED PROJECTS

Cortex — AI Study Assistant
AI Engineering Project

Live: cortex-study-ai.streamlit.app | GitHub: github.com/FaiqMohsin/cortex-ai

- Built end-to-end RAG system allowing students to upload PDFs and interact through Q&A, quiz generation, and summarization
- Implemented semantic search using ChromaDB and Cohere embed-v4.0 embeddings for accurate document retrieval
- Designed FastAPI REST backend with Pydantic validation and Streamlit frontend with session state management
- Deployed live on Streamlit Community Cloud — publicly accessible worldwide at no infrastructure cost
- Stack: Python, Cohere API, ChromaDB, LangChain, LangGraph, FastAPI, Streamlit

SmartBMS — IoT Battery Health System
Final Year Project

- Engineered IoT predictive maintenance system predicting battery SoH, SoC, and RUL via LSTM, XGBoost, and Random Forest
- Applied transfer learning from NASA benchmarks to 620M-row dataset achieving less than 2.5% RMSE accuracy
- Integrated SHAP explainability into Flutter mobile dashboard for plain-language diagnostic notifications
- Built dual-mode WiFi/Bluetooth communication pipeline using ESP32 with on-device TFLite inference
- Stack: Python, TensorFlow, PyTorch, XGBoost, SHAP, FastAPI, Flutter, ESP32, Supabase

Personal Portfolio with AI Chatbot
Web + AI Project

Live: faiqmohsin.netlify.app

- Built personal portfolio with integrated AI chatbot answering questions about skills and experience in real time
- FastAPI backend deployed on Render.com with Cohere LLM — frontend in pure HTML, CSS, JavaScript
- Stack: HTML5, CSS3, JavaScript, FastAPI, Python, Cohere API, Netlify, Render.com

SKILLS

AI Engineering

Python · LangChain · LangGraph
RAG Systems · ChromaDB · FastAPI
Cohere API · Prompt Engineering
Streamlit · Vector Databases
Generative AI · Agentic AI

Web & eCommerce

PHP · JavaScript · HTML5 · CSS3
Bootstrap · WordPress · Shopify
GoHighLevel · REST APIs
Figma · Git · GitHub

Digital Marketing

On/Off Page SEO · Technical SEO
Google Ads · Facebook Ads
Paid Ad Campaigns
Social Media Marketing
Google Analytics · Meta Business

CERTIFICATIONS

- Diploma of Website Development — Brain's Group of Colleges, 2023
- Digital Marketing and Social Media Management — Brain's Group of Colleges, 2023

LANGUAGES

English (Fluent) · Urdu (Fluent) · Hindi (Fluent) · Punjabi (Fluent)
